

## Instructor for OSSTMM training courses (100%)

### Your responsibilities

Scheduling and leading the assigned courses at Dreamlab Technologies AG. Supporting the Education-Team in the development and revision of the teaching materials and the supervision of final papers. You can find out what courses are currently on offer at [www.dreamlab.net](http://www.dreamlab.net).

### Your qualifications

You should already have a couple of years experience with Linux, have know-how of the security industry, have a technology-background (networks, operating systems, standards) and are familiar with projects in the Open Source and Open Standard environment. You should be familiar with possible threat scenarios such as: spam, phishing, network attacks, software security holes and misconfigurations. Previous teaching experience is an advantage.

You are able to fluently communicate German and French in spoken and written word. English skills are necessary and ISECOM-certification an advantage. You are flexible, willing to get to know new technologies, and goal-oriented. If you are a confident person; want to actively contribute and take responsibility, we would be glad to meet you.

### We offer

We offer a diversified and challenging environment in a young team with modern conditions of employment.

### We are

Dreamlab Technologies AG is a small, successful, international company in the IT Security sector. As co-founder and affiliate partner of ISECOM, Dreamlab works according to the OSSTMM-manual, the most widespread methodology for comprehensive audits in the security sector today.

Through membership in international organizations like the W3C and the collaboration with external experts, technical colleges, universities both domestic and international, guarantees Dreamlab access to the newest developments in IT Security.
