

Security Tester (100%)

Your profile

You are an experienced penetration-testing specialist with deepened knowledge of various operating systems (Unix/Windows) and networking protocols. Furthermore, you have good skills in high level languages like C/C++.

You are highly flexible and used to acquire knowledge on your own and therefore reside at the pulse of time. You like to work in a team and are used to deal with customers in a confident manner and well-groomed appearance. You are proficient in German and English in lettering and speech. If you fit this profile and you are no stranger to fuzzing, cracking, dictionary attacks, brute forcing etc., we are gladly looking forward to your application.

We offer

We offer a diversified and challenging activity in a young team and modern conditions of employment. Your application area covers mainly system and web application penetration tests. Depending on your skills there might be additional IT Security related tasks. Please inform yourself about our services on our website www.dreamlab.net

We are

Dreamlab Technologies AG is a small successful, internationally straightened company in the IT Security sector. We realize, integrate, secure and maintain Open Standard solutions based on „best in-class“ Open Standard Technologies. These products help our customers to fully explore their business goals in compliance with various industry standards and regulations.
